Cool Comfort, Lower Bills

70% Energy Saving & 40% Faster Cooling

Powered by DUAL Inverter Compressor™, it provides an impressive 70% increase in energy efficiency and delivers a 40% faster cooling performance, saving on electricity bills for quicker cooling comfort.

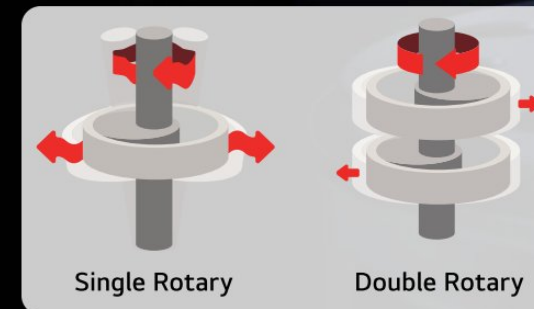

LG inverter air conditioners(US-Q242K) saves up to 70% more energy and 40% more faster cooling than LG non-inverter air conditioners(TS-H2465DAO). *Initial Temperature(Outdoor 35°C, Indoor 33°C), Setting Temperature(26°C), Testing Time (8 Hours).

Efficiency, Beyond Limits

Dual Inverter Compressor™

Dual rotors offer superior energy efficiency and quicker cooling compared to a single rotor due to their broader range of rotational frequencies.

The Dual rotors outperform single rotors in terms of efficiency, speed, and noise reduction.

Control Your Saving

With Active Energy Control (AEC), you can select the air conditioner's power input levels based on your requirements. You can save the energy using AEC instead of raising the set temperature.
